Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on Oct 23, 2002
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11; 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 3-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 4, it is not understood what this ratio to ratio is defining. Is this a range for the ratio. There is only one ratio. If both of (ii) are "0", then there is none of (ii) in the material. This is confusing. Besides, the way the claim is written, the material only has to contain one of the elements, i.e. the material need only have one of all the listed elements of (i) or (ii) or (iii). Cl. 5, how can the middle number be more than "0"? Based on cl. 4?

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

Art Unit: 3723

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 3-13, as best understood, are rejected under 35 U.S.C. 102(e) as being anticipated by Broom et al-6,037,469.

Broom teaches a material made from the claimed groupings. The intended use of the material does not further limit the claims.

Response to Arguments

5. Applicant's arguments filed 10-23-02 have been fully considered but they are not persuasive. Claim 13 is claiming a treatment material. The use of the material, if it is added into something does not further limit the claim. This is intended use. The preamble is clearly claiming a treatment material, not a combination of material and some other composition. In regard to the other claims, the intended use of the treatment material "in a method for removing a coating" does not further limit the claim structurally. In addition, the claims recite that the coating has a "hazardous metal or compound", this does not necessarily define that the compound is hazardous. These are not method claims, merely a claim for a composition with intended use. A recitation of the intended use of the claimed invention must result in a structural difference between the

Art Unit: 3723

claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In a claim drawn to a process of making, the intended use must result in a manipulative difference as compared to the prior art. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963).

On page 6, applicant states that Broom does not make reference to “alum, ferrous sulfate, ferric sulfate, or metallic iron”, however, these are only options of a group of elements that the treatment material “may” consist of. The same is for the fact that “portland cement” is not disclosed. This is only an option out of several choices that the treatment material can be composed of.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however,

Art Unit: 3723

will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
